

HOLLY HUNT ART

BIOGRAPHY AND STATEMENT

BEATRICIA AND SAGAR

CLOUD GRIDS

These are examples of the variety of ways the individual painting changes as they are placed in a new composition. They become notes of the synchronous vibrations of each neighboring painting. The result is more like a world of suggestions and interactions.

EXQUISITE JOURNEYS

This work is built by layering paint and collage to completion, and then it is washed and wiped by a raining, dripping paint to create a lush surface. Some of its secrets are kept and some are revealed. The eye is forced to search for clues to these Exquisite Journeys.

SCENES

The scene paintings explore narrative through the imagery of Interiors. Within the architecture of each painting, waiting in the wings are endless artistic inventions of shape, color, patterns, created with paint and collage.

TOTEM PAINTINGS

These elegant elongated paintings with richly painted surfaces have been part of my work for many years. They occupy the space around them with a kind of determination and are beautiful in a variety of groups.
