

Stair Runners & Wall to Wall Rugs Guide

HOLLY HUNT strongly recommends that the order dimensions for stair runners and wall-to-wall installations be specified by a professional installer familiar with hand-knotted rugs. It is the responsibility of the client to work with their own vetted installer. Due to possible variance in size and shape, ordering overage is required. Rug pads are not included for orders with the intent of installation.

Stair Runners

Beyond Borders runners are available in wool, silk, and performance fibers. Solid rugs and patterns with a small repeat are preferred as they provide the best possible pattern matching from stair to stair. Both small and large scale Beyond Borders patterns can be re-scaled to the client's preference for runner application. **Designs with borders or patterns that do not flow to the edge of the rug can have variance in border size. Because of this it is recommended that the design flows to the edge of the rug.**

Straight Staircase

On a straight staircase runner intended for **wall-to-wall installation** 6" of overage on the width and length is required for trimming down on site.

On a straight staircase runner with margins, or **"floating" installation**, 6" of overage on the width and length is required for trimming down on site.

To accurately quote dimensions for a straight staircase, the installer must factor in the below measurements:

- Length and width of each tread
- Length and width of each riser
- Lip/nosing or tread overhang
- Number of steps

Upon request, extra yarns can be sent for on-site binding at no extra cost.

Curved Staircases

On a curved staircase runner intended for wall-to-wall installation 6" of overage on the width and length is required for trimming down on site.

On a curved staircase runner with margins, or "floating" installation 6" of overage on the width and length and a template is required for trimming down on site.

To accurately quote dimensions for a curved staircase, the installer must factor in the below measurements:

- Length and width of each tread
- Length and width of each riser
- Lip/nosing or tread overhang
- Number of steps

Upon request, extra yarns can be sent for on-site binding at no extra cost.

Wall-to-Wall Carpeting

Wall-to-wall orders are available in all fiber content options and are to be quoted with an additional 6" of overage on the length and width. A 15% upcharge applies for rugs over 12' wide.

For a wall-to-wall order that has architectural details to be considered, e.g. a vent, fireplace, beam, we recommend the installer make the appropriate cuts on site to guarantee perfect fit at time of install.

Upon request, extra yarns can be sent for on-site binding at no extra cost.
