

COFFEE BEAN:

product information:

Based on the Italian method of making scagliola, McCollin Bryan have developed a selection of sculptural cast objects. The surfaces have a natural looking patina and are slightly pitted in places. Every piece is pigmented individually resulting in their unique appearance. The pieces are suitable for indoor use only.

Care:

It is recommended to clean the table with a beeswax polish (Briwax is good, do *not* use a spray polish) this will maintain a protective seal. A small amount of wax should be applied with cloth then buffed with a clean dry duster. Any spills should be wiped away as soon as possible. Any water marks that do result from spills will fade away with regular polishing. Do not clean with wet cloths.
