CLEANING & CARE

- For optimal textile performance, maintain fabrics by gently cleaning the surface regularly with a soft cloth, wipe or blot spills as soon as they occur, and spot clean soon after stains occur. When spot cleaning, always test a small, inconspicuous part of the furniture in case of discoloration or shrinkage. For periodic maintenance, GREAT PLAINS recommends using a solution of lukewarm water (max 35°C, 95°F) and a neutral soap.

SPILLS OR STAINS

- For any liquid or gel stains, GREAT PLAINS recommends blotting immediately with a dry cloth to lessen the chance of a permanent stain.

SPECIFIC STAINS

- **SOFT DRINKS:** Remove as much residue as possible by blotting with a towel. Clean with water and neutral soap.
- **ALCOHOLIC BEVERAGES & COSMETICS:** Remove as much residue as possible by blotting with a clean towel. Follow by cleaning with water and neutral soap. If the stain is persistent, clean with diluted (10%) ethanol, then clean again with water and neutral soap, then rinse. Air dry before use.
- **INK, OIL & GREASE:** Apply perchloroethylene (dry cleaning fluid) delicately from the outside of the stain towards its center to avoid halos.
- If the use of solvents is necessary, verify their effect on the product by testing in a hidden area. If they alter the color or remove the finish from the product, do not use them. **DO NOT** use cleaners that contain muriatic or hydrochloric acid (found in tile and toilet bowl cleaner).
- Finally, please note that these fabrics may be damaged by petroleum or oil-based solvents. Such solvents may remove the plasticizer in the fabric and cause permanent stiffening.
