CLEANING & CARE

- For optimal textile performance, maintain fabrics by gently vacuuming dirt before it becomes embedded, wipe or blot spills as soon as they occur, and spot clean soon after stains occur. When spot cleaning, always test a small, inconspicuous part of the furniture in case of furniture discoloration or shrinkage. Avoid excessive brushing that may abrade the fibers.
- Creasing or bruising of the pile caused by everyday use can often be restored with minimal steaming to the back side of the velvet.

(cleaning and care, continued...)

- This item should be professionally dry cleaned with any solvent except trichloroethylene.
- Never iron the velvet on the pile side. Ironing should be minimal and only applied to the back of the velvet after placing the fabric pile down on a soft surface.
