## CLEANING & CARE

- For optimal textile performance, maintain fabrics by gently vacuuming dirt before it becomes embedded, wipe or blot spills as soon as they occur, and spot clean soon after stains occur. When spot cleaning, always test a small, inconspicuous part in case of discoloration or shrinkage. Avoid excessive brushing that may abrade the fibers.
- Only mild, water-free cleaning solvents may be used for cleaning in a well ventilated area. Do not saturate the fabric and DO NOT USE WATER.
- Use of water based or detergent based solvent cleaners may cause excessive shrinkage and staining. Water stains may become permanent and impossible to remove with solvent cleaning agents.
- Professional dry cleaning is recommended for overall cleaning.
