CLEANING & CARE

- Gentle, professional dry cleaning with any solvent except trichloroethylene is recommended.

STEAMING

Vanity Fair is treated with an anti-crease finish which helps to restore the pile to its original direction.

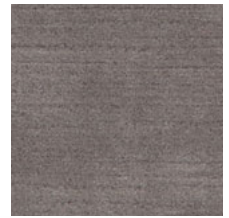

- If pressure marks are evident, Vanity Fair can be steamed to return the pile to its original direction.
- Gently apply steam to the face of the pile for about 15-20 seconds, keeping a small gap between the iron and the pile. Never allow the iron to make direct contact with the velvet pile. Once steamed, gently brush the pile with and against the pile direction. For best results, leave the fabric to dry for one day so that it can adjust to room temperature and a normal humidity level.
